DETAILED ACTION

This office action is in response to the after final amendment received on November 5, 2003. In accordance with the amendment, previously indicated allowable subject material has been amended into independent claims 1, 10, and 18. Dependent claims 7, 16, and 24 have also been amended to correct resulting dependency errors. Claims 2-5, 11-14, 19-22, 26, and 27 have been canceled.

Drawings

The drawings filed on July 14, 2003 are acceptable subject to correction of the
informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO948. In order to avoid abandonment of this application, correction is required in reply to the
Office action. The correction will not be held in abeyance.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the relevant prior art does not teach or reasonably suggest a radially symmetrical optoelectronic module as claimed, further comprising: a sleeve formed of resilient material engaged over an outer periphery of the ferrule for mounting the ferrule in a housing, the sleeve being frictionally engaged over the outer periphery of the ferrule, and the sleeve and the ferrule each include projections for limiting relative axial movement therebetween. These components, in particular the projections for limiting relative axial movement, are not taught or reasonably suggested by the closest prior art of record (Gilliland et al. U.S.P. No. 5.815.623).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue Art Unit: 2874

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance"
